

## Student exchange at Helzel Messtechnik: The French Ecole La Croix Rouge sent two students for educational exchange

For 8 weeks Helzel Messtechnik GmbH hosted two students from France within the European exchange programme ERASMUS.

Sylvain Le Gal and Vincent Le Breut took the opportunity to get familiar with the Helzel team, the organisational structure and with the details of the sophisticated over-the-horizon technique of the WERA Remote Ocean Sensing system which makes 90% of the business of Helzel Messtechnik.

The Ecole La Croix Rouge is a private educational school situated in Brest with direct access to the maritime companies of the region. Maintenance trips to the WERA systems in Büsum were on their programme as well as smaller development works which they had to resolve on their own.

Next to technical oriented knowledge, they had to fulfill tasks in the field of economy. The final exchange report reflects the entire variety of their stay.

Sylvain and Vincent: It was a pleasure to have you with us!

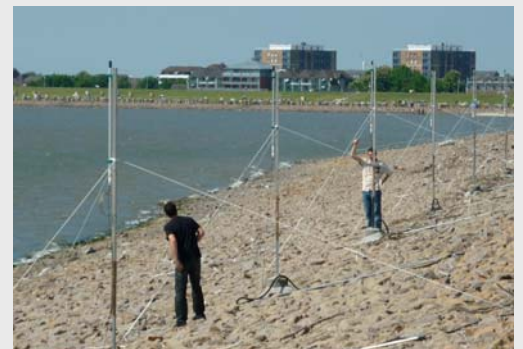

Vincent Le Breut

Sylvain Le Gal

as part of the Helzel Team

Vincent and Sylvain during a field trip to modify the WERA System in Büsum, German North Sea coast (owned by GKSS)

Details on the Ecole La Croix Rouge could be found at [www.ecole-croix.rouge.com](http://www.ecole-croix.rouge.com) and on the European ERASMUS exchange programme under <http://eu.daad.de/eu/socrates/05612.html>
